DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "18a" has been used to designate both constriction and knurled portion in fig. 6 (page 5). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Wergen (US 6,101,893).

Wergen teaches a force sense imparting type input apparatus comprising:

Art Unit: 2832

an exterior decorating plate 13 having an opening (fig. 1);
an operation lever 14 (comprising of 14 and 16);
detection means 23;
actuator 24;
control means 22;
an operation knob 28 (comprising of 27 and 28) provided at an end of the lever 14; and
a push-pull operation (on 27; fig. 1) of said knob 28 selectively operates two switches
(the switches comprising of sensors 22 and 23).

Regarding claim 2, the protuberance portion is a portion pointed by the reference number 28, in fig. 1.

Regarding claim 3, the constriction for the knob is between reference number 28 and 15.

Regarding claim 9, a pusher 27 (of the knob 28) pushes push switches (pressure sensing switches).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wergen in view of Presently (US 3,818,154).

Art Unit: 2832

Wergen teaches the claimed invention except for the knob having a knurling portion. Presently teaches a force sensing apparatus (fig. 2) with a knob having a knurling portion (top of the knob) to provide a better grip. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the knob portion of force sensing device of Wergen with the knurled knob as taught by Presently, since the knurled knob of Presently would provide the knob of Wergen with a better grip.

6. Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wergen.

Wergen teaches the claimed invention except for either the large diameter portion or the protuberance portion having a rectangular planar shape. It would have been obvious to one having ordinary skill in the art the time the invention was made to have employed any one of the knob shapes, since it appears that the invention would perform equally well with knobs disclosed by Wergen, Presently etc. (please refer to various shaped disclosed in attached PTO-892).
